- Hindi (Intermediate)

PROFILE

Full Stack Web Developer specializing in the MERN stack, with hands-on experience building scalable and responsive web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in developing RESTful APIs, integrating frontend and backend systems, and creating user-friendly interfaces. Passionate about writing clean code, solving real-world problems, and continuously learning modern web technologies.

PROJECT

Food delivery website

A full-stack Food Delivery Web Application built with React, Node.js, Express, and MongoDB that enables users to browse a variety of food items, view detailed menus, add and remove items from the cart, manage orders, and experience a fully responsive and user-friendly interface across devices, while the backend efficiently handles data management and API requests to ensure smooth, fast, and dynamic interactions throughout the platform and an admin panel for menu item and remove and edit.

School management System

A full-stack School Management System built using modern web technologies that allows administrators, teachers, and students to efficiently manage academic activities through a centralized platform, featuring secure login authentication, role-based dashboards, student and teacher management, class and subject organization, attendance tracking, result and performance monitoring, and responsive UI for seamless access across devices, while the backend handles data processing, storage, and real-time interactions to streamline overall school operations and communication.

EDUCATION

SSC 2020 - 2021

bharanga Academy

GPA: 4.61/5

Computer Science and technology 2022 - 2026

Ahsanullah Institute of Technical and Vocational Education and Training.
